Seed Global Equity Fund

a sub-Fund of PRESCIENT GLOBAL FUNDS ICAV ("THE ICAV")

ISIN: IE000HM422E5 , Share Class: A USD. This Fund is managed by Prescient Fund Services (Ireland) Limited (The "Manager")

Objectives and Investment Policy

The Fund's objective is to generate excess returns above its Benchmark, the MSCI ACWI Index (NR).

The Fund aims to achieve its objective by investing in a diversified portfolio of global equity and equity-related securities in developed and emerging markets. The Fund will invest in these securities primarily through investment via collective investment schemes but may also invest in such securities directly, at the discretion of the Investment Manager.

The Fund may invest up to 100% of net assets in collective investment schemes, which are eligible for investment in accordance with Central Bank requirements and domiciled in various jurisdictions including the EU (Austria, Belgium, France, Germany, Ireland, Italy, Luxembourg) and the UK.

The Fund may invest up to 100% of net assets in equities and equity-related securities comprising common stock, preferred stock, closed-ended investment trusts and non-bespoke equity linked notes, which are listed or traded on Recognised Exchanges worldwide. The Fund may invest up to 20% of net assets in real estate investment trusts (REITS), which are a class of equity that invests in real property or real property related loans or interests.

The Fund may invest up to 25% of net assets in debt securities and money market instruments issued by governments or corporates comprising certificates of deposit, treasury bills, non-bespoke fixed or floating rate notes and fixed or variable rate commercial paper, fixed and floating rate government bonds, securities issued by supranational organisations and agencies and fixed or floating rate corporate bonds. Such debt securities will have (or shall be made with issuers who have) a credit rating or an implied credit rating of "investment grade" at the time of investment.

The Fund may also invest directly in global currencies of stable

economies (developed markets) for hedging purposes and to reduce risk.

Investments will have a global focus insofar as investments are not confined or concentrated in any particular geographic region or market. The Fund may have exposures in excess of 30% of the Net Asset Value of the Fund in emerging markets.

The Fund's performance is measured against the MSCI ACWI Index (NR). The MSCI (Morgan Stanley Capital International) ACWI (All Countries World Index) is a broad global equity index that represents large and mid-cap equity performance across all 23 developed and 27 emerging markets.

This Fund is actively managed in reference to the MSCI ACWI Index (NR) by virtue of the fact that the investment objective of the Fund is to outperform the Benchmark.

Any income arising from the Fund will be reinvested and it is not intended that the Fund will pay dividends.

You may buy and sell shares in the Fund on any business day in Ireland and Cape Town, South Africa.

Unless otherwise defined in this document, all words and expressions defined in the Company's current Prospectus shall have the same meaning herein. Risk and Reward Profile of the Fund

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The Fund is classified in the category indicated above due to the past behaviour of its target asset mix. The Fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- **Currency Risk** - the Fund may be exposed to currency risk in relation the valuation of assets held in currencies other than USD which fluctuate significantly over a short period of time.
- **Political Risk** - the investments may be affected by uncertainties such as political or diplomatic developments, social and religious instability, or changes in government policies, tax and interest rates.

- **Settlement Risk** - reliability of trading and settlement systems may not be the same as more developed markets, resulting in delays in receiving proceeds when selling shares.
- **Liquidity Risk** - certain stock markets have low liquidity which means it may be more difficult to buy or sell shares than on a more developed market.
- **Accounting Standards Risk** - Companies in emerging markets may not be subject to similar accounting standards to major markets, so there is a risk that their value could fluctuate significantly.
- **Custodial Risk** - custody services may be underdeveloped, meaning that a Fund may have difficulties in establishing ownership of some investments, so could suffer losses as a result.
