

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Peregrine Capital Global Equity Fund

a sub-Fund of PRESCIENT GLOBAL FUNDS ICAV ("THE ICAV")

ISIN: IE00BN135S16 , Share Class: B USD. This Fund is managed by Prescient Fund Services (Ireland) Limited (The "Manager")

Objectives and Investment Policy

The Fund's investment objective is to achieve medium to long term capital growth by investing across global equity markets.

The Fund's objective may be achieved primarily through investment directly or indirectly (via collective investment schemes) up to 100% of net assets in global equities and equity-related securities (including common stock, preference and convertible preference shares, American depository receipts and global depository receipts, equity linked notes and rights), which are listed on a recognized exchange worldwide, or subject to certain restrictions, which are not listed on a recognized exchange.

The Fund may invest up to 20% of net assets in debt and debt-related securities (comprising fixed or floating rate bonds, fixed rate, floating rate and variable rate notes, debentures and exchange traded commodities) issued by governments or corporations with a credit rating or an implied credit rating of "investment grade" at the time of investment by Standard & Poors, Moody's or Fitch Ratings Limited. Investment in non-investment grade or unrated debt is limited to 10% of net assets. Investment in exchange traded commodities is limited to 10% of net assets of the Fund.

The Fund may also invest up to 10% of its Net Asset Value in the units and/or shares of collective investment schemes, including money market funds and exchange traded funds (which are eligible for investment by a UCITS) in accordance with the requirements of the Central Bank.

The Fund may hedge currency exposure arising from security positions held by the Fund. The Fund may be exposed to all currencies both OECD and non-OECD, through both purchases and sales of securities. Cash and ancillary liquid assets may be held for cash management purposes, as cover for financial derivative instrument exposure and pending investment of subscription monies or in anticipation of future redemptions. The Fund may also use financial derivative instruments (futures and options in equity, debt, and currency markets) for efficient portfolio management purposes, subject to the conditions and within the

limits laid down by the Central Bank. Financial derivative instruments may be traded on a recognised exchange or over-the-counter. The Fund is considered to be actively managed in reference to the MSCI All Country World Index (the "Benchmark") by virtue of the fact that the performance fees payable to the Investment Manager are calculated based on the performance of the Fund against the Benchmark. However, the Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be invested in securities which are not constituents of the Benchmark. This Share Class will not pay a dividend. Any income arising from the Fund will be reinvested to grow the value of your investment. The Fund is suitable for investors seeking medium to long term capital appreciation and who have a high risk investment profile. You may buy and sell shares in the Fund on each business day in Ireland on which banks in Ireland are open for business.

Unless otherwise defined in this document, all words and expressions defined in the Prospectus shall have the same meaning herein. Please refer to the "Investment Objectives and Policies" section of the Prospectus and the "Investment Objective" and "Investment Policy" sections of the Supplement for further information.

Risk and Reward Profile of the Fund

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The Fund is classified in the category indicated above due to the past behaviour of its target asset mix. The Fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- **Interest Rate Risk** – the value of the Fund's fixed income investments may change adversely due to a change in current or expected interest rates.
- **Market Risk** - the Fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company or its industry or the economy in which it operates.
- **Liquidity Risk** - the risk stemming from the lack of marketability of

an investment that cannot be bought or sold quickly enough to prevent or minimise a loss.

- **Investment Risk** - There is no guarantee that the investment objective of the Fund will be achieved. A capital loss of some or all of the amount invested may occur.
- **Currency Risk** - the Fund may be exposed to currency risk in relation to the valuation of assets held in currencies other than its base currency
- **Derivatives Risk** - Derivatives are highly sensitive to changes in the value of the assets they are based on. The use of derivatives may result in gains or losses that are greater than the original amount invested.
- **Counterparty Risk** - The insolvency of any institutions providing services, such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- **Developing Market Risk** – Some of the countries in which the Fund invests may have less developed legal, political, economic and/or other systems. In particular, investing in emerging countries involves certain risks and special considerations not typically associated with investing in other more established economies or securities markets. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.
- **Common Stocks Risk** - The value of a company's stock may fall as a result of factors relating directly to that company, such as decisions made by its management or lower demand for the company's products or services. A stock's value may also fall because of factors affecting not just the company, but companies in the same industry or in a number of different industries, such as increases in production costs. The value of a company's stock may also be affected by changes in financial markets that are relatively unrelated to the company or its industry, such as changes in interest rates or currency exchange rates.

Charges for the Fund

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charges	1.18%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance Fee	15% of the difference between (i) the daily cumulative percentage movement of the Net Asset Value per Class B Shares (after deduction of all other fees and expenses); and (ii) the daily cumulative performance of the Benchmark.
-----------------	--

The Exit and Entry charges shown are maximum figures, and in some cases an investor may pay substantially less, or there will be no charges at all. You can find out the actual entry and exit charges from your financial advisor, distributor or from Prescient Fund Services (Ireland) Limited (the "Manager"). The ongoing charges figure is an estimate based on a projection of the expenses of the Fund for the first twelve months of operation of the Fund, which includes estimates of any sales charges and ongoing charges which may be levied by the underlying collective undertakings into which the Fund invests. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another UCITS or collective investment undertaking. You can find more details about the charges in the section of the Prospectus entitled "Fees and Expenses" and in the Fund Supplement.

You can find more details about the charges in the section of the Fund's Prospectus entitled Fees and Expenses.

Past Performance

The chart shows the Fund's annual performance in USD for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end.

The Fund was launched in 2020 and shares in this class were issued in 2020.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

Past performance is based on the net asset value (NAV) of the Fund and is not a reliable indicator of future results.
