---	---	---	---	---	---	---

The indicator above is not a measure of the risk of capital loss, but a measure of the Sub-Fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. A category 1 fund is not a risk free investment, the risk of loss is small but the chance of making gains may also be limited. With a category 7 fund, the risk of losing money is high but so also is the possibility of making gains.
- The Sub-Fund is classified in the category indicated above due to its target asset of highly liquid global equities.
- The Sub-Fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

The investment strategy will restrict the extent to which the Sub-Fund's holdings may deviate from the Benchmark. This deviation may be material.

As part of its investment strategy, the Sub-Fund applies (i) some fossil fuel exclusions in accordance with the Investment Manager's fossil fuel exclusionary policy (i.e. in relation to companies that have material involvement in thermal coal, oil sands, fossil fuel reserves, oil & gas equipment and services and oil & gas extraction and production) and (ii) wider principle based environmental, social and governance ESG exclusionary criteria (e.g. failure to comply with UNGC principles, controversial weapons, tobacco).

It is intended that Gross Income Payments (as provided for in the Prospectus) will be made at the discretion of the Manager in accordance with the provisions of the Prospectus.

Unless otherwise defined in this document, all words and expressions defined in the Fund's current Prospectus shall have the same meaning herein.

You may buy and sell units in the Sub-Fund on any day (except Saturday or Sunday) on which banks in Ireland and England are generally open for business.

Please refer to the "Investment Objectives and Policies" section of the Prospectus for further information.

value of these shares can be negatively affected by changes in the company or its industry or the economy in which it operates.

- Exchange Rate Risk - changes in exchange rates between the currencies of investments held by the Sub-Fund and the Sub-Fund's base currency may negatively affect the value of an investment.
- Operational Risk - the Sub-Fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets.
- Liquidity Risk - the risk stemming from the lack of marketability of an investment that cannot be bought or sold quickly enough to prevent or minimize a loss.
